Date: 5.8.2017

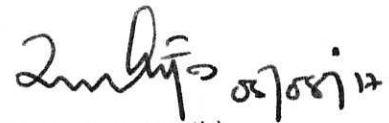

TRADE NOTICE NO. 18

Sub: Non-availability of Berth No. 10 and 11

MPT has received a few concerns from the Masters of the vessels regarding the fender system at Berth No. 10 and 11. Accordingly, in order to address to this concern of the Trade, MPT has taken the work relating to the replacement of existing fenders with high quality of Cell fenders.

As a result, the Port would not be able to make available the Berths on the days when the fenders are to be fitted. However, in order to reduce inconvenience to the Trade, it has been decided to take one Berth at the time for this purpose and decommission it for a period for three (3) days.

Therefore, this is for the information of the Trade Fraternity that the Berth No.10 shall not be available between 21st August till 23rd August 2017 and Berth No.11 shall not be available from 24th to 26th August 2017. It is requested to kindly inform all your principals and the member of the Trade accordingly. Every effort shall be made by the Port to ensure the work is completed within the scheduled time, if however, the work gets extended by a day or two due to inclement weather conditions then we seek the patient understanding and the support of the Trade. This is in the larger interest of the Members of the Trade to provide them efficient and quality service from MPT.
